

	APC9	APC9-P	APC9-SD	APC45	APC45-SD
Caliber	9 x 19 mm	9 x 19 mm	9 x 19 mm	.45 ACP	.45 ACP
Operation	All APC9 and APC45 are available as select fire sub-machine guns or as semi automatic only carbines.				
System	Closed bolt low recoil blow back system				
Magazines	Translucent polymer magazine, 15, 20, 25, 30 round sizes			Steel magazine, 12, 17, 25 round sizes	
Barrel Length*	175 mm	240 mm	146 mm	175 mm	146 mm
Weight Empty**	2.7 kg	2.8 kg	3.1 kg	2.8 kg	3.2 kg
Length min./max.	385 mm / 597 mm	450 mm / 662 mm	556 mm / 768 mm	385 mm / 597 mm	556 mm / 768 mm
Stock Pull	340 mm	340 mm	340 mm	340 mm	340 mm
Primary Sighting System	Aimpoint® Micro TL red dot sight				
Secondary Sighting System	Integrated Flip-up emergency sights, rear sight adjustable				
Rate of Fire***	1080 rpm	1080 rpm	1000 rpm	900 rpm	1000 rpm

\* Other configurations are available on request.

\*\* Weight including Aimpoint, empty 30 round magazine (APC45: 25 round magazine), QD front grip.

\*\*\* Applies only to select fire sub-machine gun version

All specifications are subject to change without prior notice. Data are mean values and therefore not suitable acceptance criteria.

**.45 ACP**

B&T believes that the .45 ACP is not dead. As a matter of fact we believe that it has many uses in today law enforcement world. There has been a noticeable increase in the desire for a carbine or a submachine gun firing larger slower bullets than the recent crop of weapons designed to fire light, fast bullets. This puts the APC45 in a unique position of being one of the lightest and most compact .45 ACP carbines on the market today. Another interesting point is that the hydraulic buffer reduces the recoil of the .45 ACP cartridge. This allows a tight shot group with easy to control short bursts.

**1. Stock** – While the APC9/APC45 comes with a foldable but not length adjustable stock (top), two other foldable telescopic stocks are available. The telescopic stock (middle) has an additional clamp-on check rest to add an extra 12 mm in case special scopes (e.g. night vision) with a higher mount are used. The helmet stock (below) will enable the operator to use the APC while properly wearing a ballistic face visor, a protective mask or SCUBA gear. The telescopic stock (lowermost) does not widen the dimensions of the gun when collapsed.

**2. BT Weapon Mounted Lights** – These state-of-the-art tactical illuminators were designed from the very beginning for B&T by the well-known INFORCE company as weapon light not as a handheld flash light modified to weapon use. They are very lightweight, the solid state design is impervious to shocks and powerful enough to produce, depending on the model, up to 800 lumens of output. The lights are small in size, do not require cables which can easily break and are activated with a simple pressure switch designed to be easy to operate with gloves.

**3. Brass Catcher** – This accessory is an absolute must when working in, on or around vehicles, ships and aircraft. The containment of the hot brass is important wherever combustible materials are present. The brass catcher mounts directly on the right side NAR/Picatinny rail. It pivots easily and quickly for manipulations and safety inspections.

**4. Magazines and Magazine Clamps** – B&T offers a variety of magazine sizes, suitable for every task the operator might face. i.e. the 15 round magazine (12 rounds .45 ACP) for concealed carry within a close protection team or the 30 round magazine (25 rounds .45) for overt missions like SWAT interventions. B&T additionally offers a magazine clamp. It will permit the user to mount two magazines together in parallel when seated in the magazine well. This will enable the operator to make swift and efficient magazine changes in any tactical situation. B&T also produces a magazine pouch that will fit both magazines clamped together.

**5. Sound Suppressors** – Due to the many advantages suppressors offer, these accessories are a must with modern police and military weapons. As learned in the actual asymmetrical conflicts a good suppressor will bring safety and security to the user. Some of the most noticeable benefits are sound and muzzle flash reduction, command & control, friend/foe identification and of course hearing protection. B&T offers several suppressors, which can be attached to the APC9/APC45 within seconds and without any tools. A suppressor does not degrade accuracy, but rather in many cases improves it.

**6. Manipulation Gun** – The red manipulation version is an inert gun, where all parts are machined as not to be interchangeable with live weapons. It is impossible to switch out parts to make it a live weapon. However all controls function identically to the live weapon, giving the student a completely realistic but completely safe training “weapon”. **Training Ammunition Gun** – B&T also offers a blue training model for such ammunition as Force on Force®, Simunition® and UTM. These interactive marking ammunitions are a must for modern professional training.

B&T is certified as per ISO 9001 quality and ISO 14001 environmental management standards

# APC9/APC45 – ADVANCED POLICE CARBINE

## 9 x 19 mm/.45 ACP

The APC9/APC45 was designed to meet the demanding needs of modern police, special forces and militaries worldwide. The result of this engineering masterpiece is a light and small carbine/SMG that is delivered complete with all the features modern operators demand in order to succeed in all kinds of missions under all possible conditions.

# APC9/APC45 – ADVANCED POLICE CARBINE

**Expandable Folding Stock**

The positive lock folding buttstock may be rapidly opened in one swift motion. The overall length of the APC folded is only 38,5 cm. Three more different stocks are available to perfectly fine-tune the APC to the needs of the operator.

**Shock Absorbing Buffer (Inside)**

The hydraulic buffer system reduces recoil, improves accuracy for follow up shots, eliminates bolt bounce, protects optics and reduces wear and tear on the receiver. With automatic fire the results are much tighter burst groups.

**Flip-Up Emergency Rear Sight**

The Flip-Up Emergency Rear Sight is adjustable for perfect alignment with the optic.

**Ambidextrous Safety/Fire Selector**

The 3-position ambidextrous fire mode selector provides the user friendly selection of safe, single and burst fire mode. The weapon can be placed on safety when stored with the hammer forward.

**Pistol Grip**

Perfect angle for fast target acquisition. Accommodates any size hands with or without gloves. It is complete with an integrated storage compartment for lens caps, cleaning kit or spare batteries.

**Aimpoint® Micro TL**

Ultra compact red dot sight provides fast and accurate target acquisition for all users regardless of expertise.

**Reversible Charging Handle**

Fully ambidextrous to accommodate any operator, regardless of his/her previous training.

**Integrated NATO Accessory Rail**

The NATO accessory rail (aka Picatinny Rail) is machined and integrated into the upper receiver, resulting in perfect alignment for outstanding accuracy.

**Emergency Front Sight**

The Flip-Up Emergency Front Sight is integrated into the NAR/Picatinny Rail for a low surface profile.

**Trigger**

The two-stage trigger provides a very crisp reset for quick follow up shots.

**Bolt Catch Button**

The central bolt catch button allows the operator to quickly lock the bolt in the rearmost position for safety inspections.

**Ambidextrous Bolt Release**

Enables any operator perform a reload in a safe and rapid manner.

**Ambidextrous Magazine Catch**

Accommodates any operator, regardless of previous training and enables him to perform a reload in a safe and rapid manner.

**Additional NATO Accessory Rails**

Lateral and lower NAR rails at the 3, 6 and 9 o'clock position for use with lights, lasers and other accessories.

**Translucent Magazines**

Available in 15/20/25/30 rounds, translucent high-tech polymer. .45 ACP in 12/17/25 rounds, metal body.

**Suppressor Interface**

The 3-lug interface enables users to mount suppressors or other accessories in a matter of seconds without tools.

**Quick Detachable Foregrip**

Provides the operator a stable shooting grip and keeps the support hand well away from the muzzle.

Today's law enforcement requires a police support weapon to fulfill several different missions at the same time as delivering optimal performance for all operators. This includes vehicle patrol, dismounted patrol, special team, surveillance or VIP protection. This is where the APC comes into its own. The weapon is simple enough that any operator with minimum training will be able to use the weapon easily, safely and effectively. The APC is 100% Swiss design and represents one of the lightest and most compact weapons of its type in production today. The fully ambidextrous operating controls will ensure an easy transition for any police agency in training its personnel with the weapon. The carbine is loaded with many features that law enforcement agencies have long demanded from a modern police carbine. These include, Aimpoint® Micro TL red dot sight as standard so as the weapon is passed from shift to shift the current user will be safe and accurate, folding stock for quick exit from a vehicle and NATO Accessory rails (NAR/Picatinny) on the 3,6,9 & 12 o'clock position for mounting any modern accessory.
